

Class 1 Subject: Geography

Weather and climate

Project: A geographical study of the daily weather in the United Kingdom and climate of the world.

The British Values I will be demonstrating and deepening my understanding of will be: tolerance, rule of law, individual liberty

Vocabulary I should be able to explain and use from this unit...

Hot	Very hot in temperature, like we sometimes have during our summers
Cold	Having a low temperature or one much below normal, like our winters
Season	Seasons are different times of the year when we have different weathers. The four seasons are winter, spring, summer, and autumn.
Earth	The planet we live on
World	The Earth and all the people and things on it.

Geography

The four seasons are autumn, winter, spring and summer

Seasons happen at different times in the top half of the world compared with the bottom half of the world

In England, we are in the top half of the world.

In autumn the temperature gets colder and the weather can change lots. Leaves begin to change colour to orange, reds and browns. The leaves fall from trees

In winter, temperatures are at their coldest. It can be wet, windy and cloudy, becoming drier and much colder. There is sometimes snow. Trees have no leaves and some animals hibernate

In early spring, it can still be quite cold. It gets warmer through this season and new leaves and buds begin to grow and some baby animals, like lambs, are born.

Summer is the warmest and sunniest of the seasons but we sometimes get Thunderstorms. Trees are full of leaves.

All over the world, there are hot and cold places.

Metacognition

What am I being asked to do? Which strategies will I use? Are there any strategies that I have used before that might be useful?

Life Skills

Persistence Well-being Health Resilience
Empathy Respect Responsibility Right and wrong
