

Year 1 Computing & ICT Knowledge Organiser Spring 2

Grouping data

1. Label and match

- Describe objects by using labels.

2. Group and count

- Count small groups with a label and begin to understand that computers need help from humans.

3. Describe an object

- Find objects with similar properties and begin to understand why computers need to be given labels.

4. Making different groups

- Group similar objects in a variety of ways and be able to count these.

5. Comparing groups

- Compare and describe groups of objects and then count these.

Key Vocabulary

Object

Objects are defined each with their own properties.

Label

Identifies or describes something.

Group

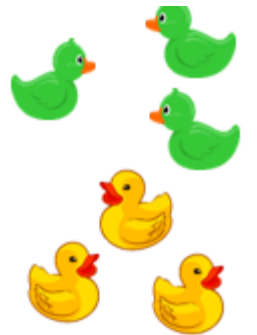

A collection of 2 or more things that are put together and labelled.

Search

To look very carefully in order to find something.

Image

A picture, graphic or photo.
