

Moon Landing

1. Vocabulary

Moon	The large round object that circles the earth and that shines at night.
Chronological order	Listing things in order of which they happened.
Astronaut	A person that travels beyond the earth's atmosphere.
2.	
Gravity	Invisible force that pulls objects towards each other.
Orbit	The path of an object around a particular point in space.
Spacesuit	A suit worn by astronauts that lets you breathe in outer space.
3.	
Crater	A very large hole in the ground.
Dock	To link with another spaceship whilst in space.
Lunar module	Spidery looking vehicle landing on the moon.
Commemorative	To honour the memory of something or someone.

4. Create a moon buggy

Create a moon buggy using junk modelling.

5. Art

Design a suit for an astronaut heading into space. Think about how they will breathe, how will they stay on the ground and how will they stay warm.
