

Glenmere Primary School RE OPENING RISK ASSESSMENT

Activities Covered by this Assessment	April 2021		
Location	Glenmere Primary school	Organisation	OWLS TRUST Supported by AFFINITY Teaching School.

Glenmere has carried out a risk assessment before opening on August 26th. The assessment has directly addressed risks associated with coronavirus (COVID-19), so that sensible measures have been put in place to control those risks for children and staff.

Last updated March 2021

If a person becomes unwell during the day, the school will refer to government guidance.

Attendance: No one with symptoms should attend a setting for any reason. The government has identified that the risk to children becoming seriously ill from Coronavirus is very low and there are negative health impacts of being out of school. Time out of school is detrimental for children’s cognitive and academic development. The impact of children being off can affect their current levels of learning and children’s future ability to learn.

This risk assessment has an initial risk assessment column; this is the risk before any measures are put in place.

The final risk is the risk based on the perceived risk after protectives measures by the school have been put in place.

Potential Severity of Harm	High Death, paralysis, long term serious ill health.	Medium	High	High
	Medium An injury requiring further medical assistance or is a RIDDOR incident.	Low	Medium	High
	Low Minor injuries not resulting in any first aid or absence from work.	Low	Low	Medium
		Low The event is unlikely to happen.	Medium It is fairly likely to happen.	High It is likely to happen.
Likelihood of Harm Occurring				

Glenmere Primary School RE OPENING RISK ASSESSMENT

Risk Rating Definitions	
Low	This is an acceptable level of risk. No further controls are required as the risk rating cannot be reduced any further. However, it is advised that continual monitoring occurs in order to ensure that no changes / deviation of control measures occur.
Medium	It is advised that further controls are implemented to reduce the risk rating to as low a level as possible. If the risk cannot be reduced to lower than a medium, then on site monitoring should occur to ensure that all stipulated controls are being adhered to.
High	This is an unacceptable risk rating. Urgent interim controls should be implemented to reduce the risk so far as is reasonably practicable. If the risk rating cannot be reduced to lower than a High , then a documented safe system of work should be implemented to control the activity. It may be necessary to seek further professional advice. Serious considerations should be given to the validity of carrying out the activity at all. Regular monitoring of the activity should occur.
