

Year 3
Spring

Around the World in Eighty Days!

Geography

We will find the countries using a map, an atlas and a globe. We will compare the human and physical geographical features of the countries saying how they are similar and different and present this information in different ways (e.g. Carroll and Venn diagrams) we will research the different climate zones in each country and research the average temperature for each of the countries and create a chart to show this. We will observe aerial view photographs to compare countries and climate zones and use the compass points to describe the countries in relation to each other.

Art

We will recall a familiar journey, such as their journey to school and represent the different objects they can see through symbols. We will find out who Georgia O'Keefe is, explore some of her work and create a piece in the same style.

PE

Running
Tennis
Gymnastics
Basketball

Computing

We will be learning to create a spreadsheet.
